

Best Stuff Business Rules

1. A manufacturer can produce several products or none.
2. A product is produced by only one manufacturer.
3. A product can have several entries in inventory.
4. A product must have been received at least once to be stored in inventory.
5. Each entry into the inventory applies to only one product.
6. The inventory, a manufacturer, or a store can have several shipments.
7. Each shipment comes *from* only one manufacturer or *to* only one store.
8. There must be at least one shipment from a manufacturer, or to a store in order for there to be a record of the shipment.
9. Each shipment will create a single change in inventory.
